Students hate campus labs

Deliver software a better way!

Campus Labs

What IT teams need

- **Efficiency**
  - Reduce the time and complexity of managing hardware in data centers and on-premises.
- **Accessibility**
  - Make software available and accessible to students and faculty on any device.
- **Reduced Markup**
  - And most importantly, avoid the high up-front and ongoing costs that come with traditional campus Labs.

What students love

- **Freedom**
  - Access to all apps, anytime, anywhere, on any device.
- **Reliability**
  - Never experience an out-of-service time and enjoy higher customer satisfaction with less downtime.
- **Privacy**
  - Data is never tied to a specific device, and users can focus on their education goals.

How to make your CIO happy

- **Provide easy access**
  - Your students' unfiltered access to all software anytime, anywhere.
- **Increase productivity**
  - Provide users with continuous access to apps, reducing support requests and increasing overall productivity.
- **Give students a better IT service**
  - Empower learners with self-service tools and reduce the need for manual administration.
- **Make IT more efficient, for less**
  - Simplify license management and reduce costs with a cloud-based infrastructure.
